Kaiju Krashers [32|64bit]

Unsatisfied by the lower rating, DESTROYABLE Chris requested a beta test to make the game as good as it can possibly be, we were more than happy to oblige. This version is designed to help, you, Chris to make the game better so it can match his expectations and what a beta can do, can do, I am just a few things differently and also have a few items added to the quest to make things more difficult, so don't be surprised by anything. From now on the chances of the end game being attained has been completely revamped. This will help you with your "End Goal" of who makes the progress to the end game and which route is the shortest for you to accomplish it. Overall the game is in a continuous state of movement, adding new items for you to experience, being patched on a regular basis, being balanced to be fair, and also experiencing a few test runs from Chris himself. This can help in your trek to the ultimate goal. To most, this game would have been never created but for Chris, this is a dream come true, this is DESTROYABLE Chris' reality. This game is his play time, his release of stressful energy, his pacification of his nervousness to achieve his goal, and it's a result of what he wanted from his life and as the result of the loss of his dog. This is what he wanted and what he came to realize that he is the king of this world. Chaos Roboski - DESTROYABLE Chris (PC) I hope you all enjoy and find this version of the game as much as I did, Thank You for taking the time to read this and may you destroy all you come across with a smile! There are a lot of requests and I'll eventually get to them. However, as soon as I'm finished with my other games that are close to completion I will be making and releasing 'Guitar Legend HD.' This will be my top priority game as it's my dream, playing rock and roll guitar along side an idol, the legend Jimmy Page. As you read the following concept, you may think to yourself that this is stupid but after playing the game you'll understand why and what I mean by a "Legend." I'll explain in detail when I get around to making the game, right now I'm in the process of testing the engine and getting this released to you all. Get set up in your first
