"Obliterate Evil" is set in a world where the Noblebloods are a minority, and the Seven Sectors are filled with hatred and intolerance. The citizens of the Seven Sectors battle each other to determine the course of history. The mission of the Seven Warriors, an elite squad of the Noblebloods, is to safeguard the Earth from sudden calamity. Each mission of the Seven Warriors introduces a new stage of the Seven Sectors War. Each mission contains hundreds of Noblebloods as well as hundreds of antagonistic Sectors Soldiers. The missions in the game contain multiple characters, multiple endings, and multiple victory conditions, and some missions can be played only by the Noblebloods. Developed by the acclaimed costume and cut-scene designer of "The Last Remnant" and "The Lost Child". Key Features: – A story where the fate of humanity is at stake – Over 100 unique characters – Numerous multiplayer missions featuring up to six players – Hundreds of missions, hundreds of characters, and hundreds of battle strategies – Beautiful, detailed cutscenes Google Play reviews now use Google+ so it's easier to see opinions from people you care about. However, the multiplayer map is a little crowded for my liking as the only thing that I like is a map with multiple routes. It makes you have to fight over space which is kind of annoying and makes strategy games not as enjoyable as it is usually. Also, the game's characters are a little boring. I like Haruko more. Kori is way too quiet. Nora I don't even have anything to say. An excellant Story, with exciting fights and stunning animations. With a very deep and coherent plot, the multiplayer is fun and easy to use. Overall, a very enjoyable game. My only suggestion is to add a few characters, maybe some extra classes and modes, as well as graphics packs like a little more snow. Just my two cents though. It's a great game. I love it. Buying one of our guides: In this lesson we will talk about the topic, Economics of Historical Fantasy Games. Today we will be talking about two similar roles that are easy to get stuck in a tiny cul-de-sac. They both have a difficult time balancing the mechanics of the game with their character role. These two roles can easily get lost in the realm of niche. Both of these roles are easy to fix by simply evaluating your character's abilities and need in your specific campaign. Instead of trying to force a role of Monster Collector or Player Hunter to a character who isn't built for it. First, lets look at the Monster Collector and Player Hunter. These characters are built for, you guessed it, collecting Monsters and hunting players. These two classes are very unbalanced in terms of powers. These classes are meant to throw as much damage as possible at anything in front of them. This means that when they are paired up in a duel they both have equal chance to win. I remember the first time I played a player hunter I spent about 15 minutes on my guard telling him not to cast his spells. It is a trivial amount of time, but to me it made him feel weak and that he was not in a winning position. He shouldn't be, his abilities and damage output are nowhere near what he thinks they are. This is a simple example of where player hunters fail in their role as hunters. The same can be said for the monster collector. They may have a couple of powers that could deal damage or even heal their monsters, but they are designed to go toe to toe with the Monster Elite. If they are to be designed in such a way that they don't have a chance they are not in their niche. I do believe that monster collector and player hunter are the best two classes, but if they are too far out of place in your specific campaign they might be keeping your character out of the game. I think it is best to take your time and do some research on the current meta before you roll out the Monster Hunter. The third class I want to talk about is the Enforcer. These characters are designed to be the protectors of the town
