

Xpraize Beta is the first game developed by the indie game company RedefineArts Inc. Inspired by a role playing video game, this is a fantasy role-playing game where each player takes on the role of the Game Master. Our game is unique in that it allows for online play and the Game Master perspective. At the start of the game, the players select the world map they want to visit, and after that, the adventure begins. The story unfolds as the players encounter monsters and NPCs with various personalities and battle them. While the players take on actions, the Game Master records the reactions of the players and the enemies. They can access this via the VR headset. In addition to the standard adventure mode, there is a special commentary mode that lets players create movies. Rewards can be used to create movies and help the player create an interesting story, so please enjoy the games.

and self-contained narrative” - 9/10 - Wired.co.uk “XploQuest’s retro attitude is infectious, and its sense of humour in the face of typical videogame barriers is refreshing. Unfortunately, a few dodgy design decisions prevent XploQuest from breaking into the commercial mainstream. If you’re looking for an entertaining, fully fleshed-out and polished chiller, look elsewhere. But if you’re interested in seeing how a designer might utilise a limited form to a new degree, it’s well worth a try.” - 8/10 - PC Powerplay  
“...indeed, the precise and zippy action and simple, yet rewarding, platforming mechanics have all the hallmarks of the late-90s arcade platformers.” - 8/10 - TechRadar.com  
“XploQuest is a perfect throwback to the high concept platforms of the arcade golden

About This Content Kaitou Saint Tail Girls #6 was originally planned as an original game. However, it was later decided that a single game was not enough. Together with the previous Saint Tail game, the others will be released as a collection. The last game, Kaitou Saint Tail Girls #5, was made to be the finale. UPDATED FEATURES Kaitou Saint Tail Girls #6 brings a new chapter to the Saint Tail story, while preserving the original ideas in the same way as #4. - 3 hours and 30 minutes STORY In the latest installment of the series, Kaitou Saint Tail Girls #6, Kagura has left Azalea in the Tainetsuya Library to go to sleep for about a year. The library has a considerable effect on Kaitou, as she loses her passion for work and becomes even more obsessed with Cat's Tail. With no one left to blame but herself, Kagura decides to move to the Tainetsuya Library. There, she meets a blind girl who claims to be a Fairy Tail mage, and finds herself an admirer of Mavis Vermilion. However, Kagura is tired of the mysterious murders in the library, and is determined to find out the truth. - FINAL FANTASY EGG: Featured as a treasure item, Final Fantasy Egg is a project to merge the worlds of the Kaitou Saint Tail series. Also, a lot of new changes have been implemented from a different angle compared to the previous game. Here are some of the changes you can expect! - Remastered graphics, a new original anime opening, new text, and narration. - New battle system that combines a classical beat 'em up format with turn-based strategy. - There are multiple types of weapons to choose from, but each weapon has its own attributes to raise its power. - Defeat enemy bosses that possess special attributes to make it even more difficult to win battles. - Dialogue and music have been revamped to reflect the overall narrative flow of the game. The song "" is used as the battle theme, the song "" is used as the opening theme, and the song "" is used as the ending theme. The updated version will be added to the soundtrack CD on August 18, 2016. - Re-recorded final part of the soundtrack CD. - Remastered the music from the game using the Arrange track and the Rap'n'Rape song. - The music

**Q: Not Able to apply Http Status 500 I would like to have an HTTP Status 500 error page in my application when there is some problem with my API so I read about this and came up with following: @ControllerAdvice public class ServerAppExceptionHandler implements ExceptionHandler { @Override public void handle(HttpServletRequest req, HttpServletResponse res, Exception exception) throws IOException { res.setStatus(HttpStatus.INTERNAL\_SERVER\_ERROR.value()); res.setStatus(HttpStatus.INTERNAL\_SERVER\_ERROR.value()); } }** Also I added spring.jackson.fail-with-any-exception property to a spring configuration of my services **spring.jackson.fail-with-any-exception=true** I'm a bit unsure this is right but I tried. Unfortunately I'm not able to reach the error page because my browser continuously tries to contact my API. **A: Based on Jim's idea, I**
