This introduces new "Catapult Speed" -- a new Player Speed and Player In-Trail Speed indicator, which now more closely resembles players' speed on the pitch. In addition, every player sprints faster when working hard, with those sprints slowing down as they rest and after they are injured. All players benefit from this, and it also affects the overall fatigue level of the team. FIFA 22 introduces "Key Moments," which are times of intense action during a match that are designed to catch the eye of the viewers. One example includes a goal in which a player receives a penalty kick and reacts with a classic ritualistic celebration. This interaction is designed to not only showcase the player's special reaction, but it is also meant to catch the viewer's eye. Also, to highlight the key moments for players who are fans of the Club or Country, the game gives fans the chance to earn in-game bonuses by shooting goals. FIFA 22 introduces "Players Talking," which sees the moment that players come together to converse on the pitch. At this moment, the players' faces begin to light up as their moods change. The end of a match is also the time when the last player leaves the pitch with their actions animated and the crowd cheering for them.
